Texture Print Collage

LET’S MAKE A TEXTURE COLLAGE!

Texture is how something feels or how it appears to feel. There are many ways to explore texture in art. One way is to paint an object and press it onto a piece of paper to make a print of the object’s texture. You can use objects from your home or even from nature to create a texture print. Combining multiple texture prints on one piece of paper creates an awesome texture collage! Ask an adult to help you find objects around your home or from nature that have an interesting texture. Some examples include sponges, yarn, leaves, bubble wrap, and tree bark.

GATHER YOUR MATERIALS:

2 to 3 found objects
White paper
Paint
Paint brush

1. Gather the objects you found around your house or from nature. Ask permission to add paint to these objects.
2. Paint one side of your first object.
3. Press the object, paint side down, onto the white paper to create a print.
4. Continue painting and making a print of each object until the paper is filled with prints.
5. Enjoy looking at the different types of texture prints created by each object!
