LET’S CREATE A QUILLED PAPER SCULPTURE!

Paper is a popular medium for creating sculptures in contemporary art. Quilling is an old-fashioned paper sculpture technique that involves rolling and gluing strips of paper together to create decorative designs. The amazing thing about quilling is that it does not involve folding or creating creases in the paper!

GATHER YOUR MATERIALS:

- Marker
- Colored construction paper
- Scissors
- Liquid glue
- 1 Piece of white paper

1. Write your first initial on the white piece of paper so that it fills most of the page.

2. Begin by cutting 1/2" strips from the colored construction paper.

3. Choose a strip and roll it around the marker so that it curls.

4. Put glue around the edge of the rolled piece of paper and stick it inside your initial.

5. Continue creating and adding paper rolls to fill your initial. You can even stack some rolls on top of one another!

You have created a quilled paper sculpture!
