**LET’S MAKE A PUPPET FROM A PAPER BAG!**

Puppeteers create different types of puppets from many everyday objects. You can do the same! By giving your puppet eyes, a mouth, and even some hair, you can bring a paper bag to life! Who will your puppet be? What will they say and do?

**MATERIALS:**
- Paper bag
- Colored markers
- Small found objects or pieces of paper
- Yarn
- Glue or tape

1. Lay your paper bag down with the flap facing toward you. This will be the face!
2. Give your puppet eyes and a nose on the flap. You can draw them with markers, cut them out of paper and glue them on, or find small objects to glue or tape in place.
3. Lift the flap up to draw the inside of the mouth. You can add a tongue or even teeth! Close the flap and add the lips. Make sure that the top lip is on the flap, and the bottom lip is on the front of the paper bag.
4. You can now add hair to your puppet! Cut the yarn to the length you want your puppet’s hair to be, and then carefully glue it or tape it to the top of the bag.
5. Use the markers and any leftover materials to add details to your puppet’s body.
6. Use your puppet by putting your hand inside the bag and fingers inside the flap. Move your hand to make your puppet talk!
